I am writing to express my interest in the Chief of Staff Operating Partner CEO Office role at Stableton Financial AG. Stableton's position as a tech-driven institutional investor reshaping private market investing is compelling, and the opportunity to work directly with the CEO on high-impact strategic initiatives is exactly the kind of challenge I seek.

My professional experience centers on building scalable systems and driving cross-functional projects from concept to delivery. As a full-stack engineer, I have developed and deployed production applications using Laravel, Next.js, Node.js, and cloud infrastructure on AWS and Linux environments. This technical foundation allows me to understand product architecture deeply, communicate effectively with engineering teams, and bridge the gap between technical execution and business strategy.

One area that particularly interests me is the operational and strategic dimension of this role. In my previous work, I have taken ownership of multiple high-stakes projects, collaborated with stakeholders to define priorities, and ensured initiatives moved forward with clear accountability. I am comfortable synthesizing complex information, identifying roadblocks, and driving resolutions with speed and efficiency.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I would welcome the opportunity to discuss how my background in technology, project execution, and cross-functional collaboration can contribute to Stableton's continued growth. I have attached my CV for your review.

Sincerely,

Md Shahanur Islam Shagor
