I am applying for the Junior Creative Strategist & UGC Coordinator role at Elavate Superfoods. The opportunity to contribute to a brand focused on health and wellness through creative content coordination is genuinely interesting to me.

Through my work as a full-stack developer and AI engineer, I have built platforms that manage user-generated content, automate workflows, and integrate third-party services. These projects required careful coordination between technical systems and content strategies, which aligns well with the responsibilities of this role.

In previous professional experience, I developed and maintained web applications where I implemented role-based access controls, real-time updates, and responsive interfaces. I also collaborated with stakeholders to translate content requirements into functional features, ensuring smooth delivery across teams.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the chance to discuss how my background can support Elavate Superfoods' creative and content goals.

Thank you for your consideration.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
