I am writing to express my interest in the Handsvertrer position at EXTRA Immobilien Gruppe GmbH. Your company's approach of combining modern PropTech technology with personal advisory services is a compelling model. The idea of using smart digital tools and data-driven marketing to make property sales faster and more transparent is something I find genuinely interesting.

My background is in full-stack development and AI engineering, with over four years of professional experience building and maintaining web applications. I have worked extensively with technologies like Laravel, Next.js, React, and Node.js, and I am very comfortable using digital platforms and tools to manage workflows, data, and client interactions. The role's emphasis on using a digital Makler-Plattform for acquisition, marketing, and communication is a direct match for my technical skill set.

In my professional experience, I have developed and integrated RESTful APIs, implemented authentication and role-based access control, and built responsive, user-friendly interfaces. I have also worked on projects involving real-time features, database optimization, and third-party service integration. This technical foundation means I can quickly become proficient with your internal systems and use them effectively to support the sales process.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my technical background and independent work style can contribute to the success of the EXTRA Immobilien Gruppe.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
