I am writing to apply for the Trainee (m/w/d) PR, Content & Social Media position at Contegy. Your focus on B2B technology and industrial clients, combined with the structured 12-month traineeship, is exactly the kind of environment where I want to start my career in communications.

What stands out to me about Contegy is the emphasis on learning from the ground up through a defined training plan, external certifications, and regular coaching. As someone with a strong analytical and technical background, I am eager to develop my skills in PR, content creation, and campaign conception while working with experienced consultants.

Through my previous work as a Web Developer, I have gained practical experience collaborating in cross-functional teams, communicating with external partners, and delivering projects with precision and reliability. I am comfortable working with complex topics and turning them into clear, structured outputs. I am also proficient with AI tools such as ChatGPT and Claude, and I am confident in my ability to quickly learn design tools like Canva or Adobe Creative Suite.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am looking for a role where I can take responsibility, contribute to a small team, and grow into a junior consultant role. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to Contegy.

Sincerely,

Md Shahanur Islam Shagor
