I am writing to apply for the Content Manager (Teilzeit) position at Ecoturn GmbH. Your platform Elektrovorteil serves a clear and growing market in the German THG-Quoten space, and I find the focus on digital content strategy and organic growth particularly interesting.

While my professional background is in software engineering, I have built and managed content-heavy web platforms where structure, clarity, and user experience directly impact performance. I understand how technical decisions affect content discoverability and how to align editorial workflows with platform capabilities.

In my work as a Web Developer, I have planned site architectures, implemented SEO-friendly metadata and internal linking structures, and developed responsive interfaces using Next.js and Laravel. These projects required me to think about how content is organized, presented, and optimized for both users and search engines.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background in building and optimizing digital platforms could support Elektrovorteil’s content goals.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
