I am writing to apply for the Head of Marketing position at orderbird GmbH. Your mission to simplify daily operations for hospitality professionals through intuitive technology resonates with my own approach to building practical, user-focused systems.

As a Full-Stack and AI Engineer, I bring a technical perspective to marketing operations. I have hands-on experience developing and optimizing web platforms, including SEO-friendly interfaces, content management systems, and performance monitoring. My work with Next.js, Laravel, and Tailwind CSS has involved building responsive, fast-loading websites that directly impact user engagement and search visibility.

In previous professional roles, I have delivered full-stack applications end-to-end, from API integration and database optimization to deployment on Linux servers with Nginx and Docker. I have also worked with analytics and monitoring tools such as Grafana and Prometheus, which aligns well with the data-driven marketing approach orderbird values. My experience integrating third-party services and managing cloud deployments on AWS and Google Cloud gives me a solid foundation for overseeing website performance and LLMO visibility.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my technical background and problem-solving approach can contribute to orderbird’s marketing leadership team.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
