I am writing to apply for the Head of Group IT position at SelectLine Group. Your focus on IT consolidation, security baseline, and AI integration across the group aligns with my technical background and interest in building resilient, scalable IT operations.

Through my professional experience, I have worked extensively with cloud platforms (AWS, Google Cloud), container orchestration (Docker, Kubernetes), and monitoring stacks (Prometheus, Grafana). I have deployed and maintained production systems on Linux servers using Nginx and Apache, and I have implemented CI/CD pipelines to streamline delivery. These skills directly support the kind of IT operations and infrastructure consolidation you are driving.

One area that particularly interests me is AI integration. I have built AI-powered assistants and automation systems using OpenAI and Replicate APIs, integrating them into full-stack applications. I understand both the strategic potential and the practical challenges of introducing AI into existing workflows. I am comfortable working with cross-functional teams to evaluate, pilot, and roll out new technologies.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my background can contribute to SelectLine Group’s IT transformation.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
