I am writing to express my interest in the Leiter Produktmanagement Kompositversicherung (m/w/d) position at Gunnar Kˆ…hne Executive Search GmbH. While my background is in software engineering rather than insurance, I bring a strong track record of leading product development, driving digital transformation, and optimizing complex systems in technology-driven environments.

Through my professional experience as a Web Developer, I have taken full ownership of product delivery from concept to deployment. I have managed end-to-end development cycles, coordinated with cross-functional teams, and continuously refined workflows to improve efficiency and output quality. This has given me a practical understanding of product strategy, portfolio management, and the importance of aligning technical decisions with business objectives.

One area that particularly interests me is the digitalization of traditional business models. In my previous roles, I have led projects that automated manual processes, integrated third-party services, and improved system reliability. I am comfortable working in transformation environments where process optimization, stakeholder alignment, and strategic project execution are critical to success.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my product management and digitalization experience can contribute to your client’s goals.

Sincerely,

Md Shahanur Islam Shagor
