I am writing to apply for the Leiter Gewerbeversicherung Sach / Underwriting & Portfolio (m/w/d) position at Gunnar Kˆ…hne Executive Search GmbH. While my professional background is in software engineering and full-stack development, I bring strong analytical thinking, project management experience, and a track record of driving digital transformation initiatives that may be relevant to this role.

Through my work as a Web Developer at Explo-IT and DataSoft LTD, I have designed and delivered scalable web applications using Laravel, Next.js, React, and Node.js. I built RESTful APIs, implemented role-based access control, integrated payment gateways, and optimized database performance. These projects required me to manage complex workflows, coordinate with stakeholders, and deliver measurable results on time.

One area that particularly interests me is the emphasis on innovation, digitalization, and transformation projects in this role. In my previous positions, I led the development of real-time features using WebSockets and Pusher, deployed applications on Linux servers with Docker and Nginx, and set up CI/CD pipelines. I also built an AI-powered financial application that automated document generation and integrated third-party services, demonstrating my ability to drive technology-driven improvements.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in software engineering, project delivery, and digital innovation can contribute to the continued success of your client’s insurance operations.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
