I am writing to apply for the Director Capital Markets (m/w/d) position at Gunnar Kˆ…hne Executive Search GmbH. The role's focus on blockchain, digital assets, and strategic transformation in the financial sector is directly relevant to my technical background and project experience.

Through hands-on project development, I have built and deployed systems that integrate blockchain concepts, secure authentication, and real-time data processing. One example is my work on a privacy-preserving blockchain framework for autonomous vehicle networks, where I implemented cryptographic chaining (SHA3-256), zero-knowledge proofs, and post-quantum cryptography to ensure data integrity and secure communication. This project required designing decentralized architectures and managing complex security requirements.

In my professional experience as a Web Developer, I have delivered scalable applications using Laravel, Next.js, and Node.js, with responsibilities including API development, database optimization, and deployment on Linux servers with Docker and CI/CD pipelines. I have also integrated payment gateways and role-based access control, which are relevant to building secure financial systems.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to your client's strategic goals in capital markets and digital assets.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
